POWER BRIEFINGS – SWEDEN DATA CENTERS

Feb 14, Washington DC
Feb 16, Silicon Valley CA

January 1st, 2017, the Swedish Government lowered the energy tax for data centers dramatically by 97%, resulting in the lowest price for electricity in Europe.

What is the effect on costs for data center operations in Sweden?

Gain insights from industry experts on how Sweden can partner with you in establishing a cost effective & sustainable presence in Northern Europe.

- Understand the details of the new energy tax. Strategic insights into the energy market and renewable power production by **Vattenfall**, one of Europe's largest generators of electricity
- Get updated on connectivity and fibre costs by one of the largest fibre-optic network operators in the world, **Telia Carrier**.
- Listen to a case study & business conditions in Sweden for data centers by **Digiplex**.
- **Ericsson**, a world leader in mobile networking and telecommunications will share details on their state of the art sustainable ICT centers in Sweden.
- Networking & sharing of experiences with peer data center operators and experts.
